DETAILED ACTION

1. The Amendment filed on November 10, 2008 has been entered. Claims 1-5 remain pending in the application. Claims 6 and 7 have been cancelled.

Reasons for Allowance

2. Claims 1-5 are allowed.

The following is the examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest a reason to combine, the use of near-infrared light therapy and vibration/massage within a probe structure including a cylindrical member having an inclination of the upper part of the housing and a removable base support member which is positioned near the prostate through insertion into the anal cavity. The relevant prior art teaches that most prostate treatments are done using thermal therapy via the urethra with the possible addition of a sensor probe positioned in the anal cavity. By way of example, U.S. 4,404,881 to Cathaud et al. teaches the use of a transrectal probe capable of receiving a detection instrument for monitoring the treatment of the prostate which is done using hyperthermia, and U.S. 5,234,004 to Hascoet et al. teaches a thermal urethral emitting probe and a rectal probe for controlling the positioning of the urethral probe. Therefore, the use of infrared light and vibration/massage with the structure of the probe device for positioning it in the anal cavity is considered novel and unobvious over the prior art of record.

Conclusion
